Motivated and detail-oriented Full Stack Developer with a strong foundation in Software Engineering, currently pursuing a degree at the University of Westminster. Passionate about building efficient, user-centered web applications and continuously improving development practices through teamwork, problem-solving, and innovation. Dedicated to learning and growing within the software development field, with a long-term goal of becoming a DevOps Engineer. Actively seeking a full-time opportunity or internship as a Full Stack Developer to contribute my technical skills, adapt to real-world challenges, and grow in a fast-paced, forward-thinking environment.

EDUCATION

G.C.E. Advanced Level (A/L) – Mathematics Stream

2019 – 2021

Royal College - Horana

Subjects: Combined Mathematics, Physics, Chemistry

B.Eng(Hons) Software Engineering

2023 - Present

University of Westminster (UK)

Informatic Institute of Technology (Sri Lanka)

First Year Modules (Level - 4)

- Computer Systems Fundamentals
- Software Development I
- Mathematics for Computing
- Software Development II
- Trends in Computer Science
- Web Design and Development

Second Year Modules (Level - 5)

- Software Engineering Principles and Practice
- Object Oriented Programming
- Database Systems
- Software Development Group Project
- Server-side Web Development
- Algorithms, Theory, Design and Implementation

Professional Certificate of Machine Learning

2025 June - Present

Informatic Institute of Technology (Sri Lanka)

TECHNICAL SKILLS

- **Programming Languages** : Java, Python, JavaScript, SQL , PHP, JavaSwing
- **Frontend Development** : React.js, HTML5, CSS3, Bootstrap
- **Backend Development** : Express.js, Spring Boot
- **Databases** : MySQL 8 & 5, MongoDB
- **Version Control** : Git, GitHub , GitLab, SourceTree
- **Software Development & Tools** : RESTful APIs, Postman, Agile, Docker, Kubernetes, CI/CD

INDUSTRIAL EXPERIENCE

Software Engineering Intern

September 2025 – Present

Genius Soft PVT LTD | Colombo, Sri Lanka

- Contributed to the development and maintenance of **POS (Point of Sale) Systems**.
- Implemented product ordering, inventory tracking, and sales transaction features as part of the core POS functionality.
- Practiced SQL queries and stored procedures for data retrieval and manipulation using MySQL Administrator, Workbench, and Query Browser.
- **Technologies:** Java, Java Swing, MySQL 5 & 8
- **Version Control:** GitLab (managed vis SourceTree)

PROJECT EXPERIENCE

Healthcare System - Health Nexus

Present

- Developed a healthcare platform for appointment booking, prescription management, and patient medical records, Emergency services, telemedicine consultations while maintaining complete medical records and prescription management.
- Technologies : Spring Boot, Java, Restful APIs, MySQL, React.js.
- Development tools : postman, Git (version control) , Docker, Swagger, Codecov
- Live Demo: <https://health-nexus.netlify.app>

E-Commerce Application – POS System

Present

- Developed a full-featured Point of Sale (POS) system to manage retail operations including product, inventory, sales management. Implemented customer and supplier management and sales analytics and reporting using Jasper Reports, and a secure role-based authentication system.
- Built backend services following a **microservices architecture** with RESTful APIs and API gateway.
- Containerized the application using **Docker** and managed services with Docker Compose.
- Technologies: Java, python, Spring Boot, RESTful APIs, React.js, MySQL, JasperReports, FastAPI
- Development tools : postman, Git (version control) , Docker, Swagger, Codecov
- Live Demo:- pos-system-pro.netlify.app

Wedding Management System (Backend and Frontend team lead) 2024-2025

- Software development group project (second year project).
- A wedding planning system with a mobile app for customer and a web platform for admin and vendors to streamline wedding arrangements.
- Backend : REST APIs with Node.js (Express.js) and managed MySQL database.
- Frontend : React.js, React Native
- Development tools : postman, XAMPP, Git (version control) , Android studio.
- Live Demo : [wedify.netlify.app](#)

University management System (Intern Test Project) 2025

- Developed a university management system to manage students, lecturers, and courses with full CRUD functionality.
- Implemented a lecturer payment management system with filtering by name, payment amount, and conducted courses.
- Generated automated reports for monthly payments, lecturer details, student records, and course information using JasperReports.
- Technologies : Java, Java Swing, JasperReports
- Development tools : SourceTree, GitLab,

Real Time ticket Booking System 2024

- Developed a real time ticket booking system using Java Object Oriented Programming principles.
- Technologies : Spring Boot, React.js, MySQL

Hotel Management System 2024

- Using Java with OOP concepts and Multi-Threading
- Technologies : Java, JavaFX

Product Order System 2024

- Implemented a product order booking for book a product, check inventory
- Technologies: Spring Boot, MySQL

Plane Ticket Booking System 2024

- Implemented a seat availability feature for real-time booking visibility.
- Technology : Java

Eco-Friendly Sustainable System (First year group project) 2023

- Developed a web application using HTML, CSS, JavaScript

Student management System (First year project) 2023

- Implemented a student management system for check their result, attendance with graph
- Technology :- Python
